

Ecotoxicological information

Product: MM-F2

AB Regin

Version date: 2008-03-28 **Version number:** 1 **Print date:** 2008-11-13 **Page:** 1(1)

Isobutanol included 1<10%

Degradability:

Primary degradability >90%.

Bioaccumulation:

No bioaccumulation expected. Log Pow 0.65

Ecotoxicological data

Acute toxicity. LC50 96 hours fish 1000-3000 mg/l

Acute toxicity. EC50 48 hours Daphnia 1250 mg/l

Acute toxicity. IC Lo 8 days alg 290 mg/l

Degradability

Light biological degradability. > 99 % after 14 days OECD 301 A.

BOD5/COD 0.4
