RDAS5...

Damper actuator, 5 Nm

Damper actuator without spring return, 5 Nm. For 2-point (on/off)/3-point or 0...10 V control signal.

- ✓ Torque 5 Nm
- ✓ For dampers up to 0,8 m²
- ✓ Special versions with auxiliary switches
- ✓ 24 V and 230 V supply voltage
- ✓ Combined 2-point (on/off)/3-point or 0(2)-10 V control
- ✓ Manual override

Application

The actuators are used in ventilation and air conditioning plants to operate air dampers and air throttles. The actuators can be used for damper areas up to 0.8 m² and are friction-dependent

The damper actuators are suitable for modulating controllers (DC 0...10 V) or 2-point/3-point controllers, e.g. rotary and linear dampers for air outlets

Function

When the supply voltage is connected, the actuator moves to a working position corresponding to the control signal (2-point, 3-point or 0…10 V). The position indication is mechanical and electrical. The rotational angle range is self-adaptive and the auxiliary switches for supplementary functions are adjustable.

Installation

The actuator is mounted on a mounting bracket. For easy access to the cables and the setting elements on the front of the actuator, choose the mounting position carefully.

The mounting bracket (see dimensions) is required for mounting on the damper shaft. The insertion depth for the bolt into the housing must be sufficient and guaranteed.

The actuator can be manually adjusted by pushing the gear train disengagement button.

Technical data

Mounting	Mounting bracket, interior, weather protected
Torque	5Nm
Max. damper size	0,8 m^2
Running time, actuator	150 s/90°
Damper shaft, round	8…16 mm alt. 8…10 mm (with centering element)
Damper shaft, square	6…12,8 mm
Damper shaft, min. shaft length	20 mm
Damper shaft, hardness	<300 HV
Working angle, rotation	90°
Angle limitation	95°
Sound power level	28 dB
Cable length	0,9 m (Maximum extension 300 m)
Cable	0,75 mm^2
Ambient humidity	0…95% RH (non-condensing)
Ambient temperature	-32…55 °C
Storage temperature	-32…70 °C
Protection class	IP54
