

REACH – Declaration of Conformity to EC 1907/2006

REACH (Regulation (EC) No 1907/2006) is a European Union regulation concerning the registration, evaluation, authorisation and restriction of chemicals.

There are two main parts of the REACH legislation:

1. Companies manufacturing or importing chemical substances into the European Union in quantities exceeding one tonne per year may be subject to registration requirements under REACH. Registration obligations may also apply to substances contained in or intentionally released from articles under specific conditions.
2. Companies supplying products within the European Union must identify and communicate the presence of Substances of Very High Concern (SVHC) included on the ECHA Candidate List when present above the applicable threshold of 0.1% (w/w). The Candidate List is regularly updated by ECHA and may expand over time.

The requirements of Regulation (EC) No 1907/2006 (REACH) apply to all products offered by AB Regin, and the statements are based on our current knowledge, experience, and information provided by our suppliers. Based on the ECHA Candidate List valid at the date of issue, none of our products contain SVHC substances above the applicable communication threshold of 0.1% (w/w). Our products are regularly checked in accordance with REACH requirements and, if necessary, adapted to changing requirements.
