

E-CASE- C283DT-3-24

EXOcompact demo case

Complete case with everything you need to test EXOcompact. Simply plug the controller into the wall socket and start it up in order to make simulations, trigger alarms, view indications, etc.

- Easy to carry with you

- An excellent tool before commissioning

Applications

The demo case consists of an EXOcompact C283DT-3-24 and equipment suitable for easy testing of configurations and individual functions before commissioning. Real-life situations can be simulated by manoeuvring all analogue and digital inputs and monitoring all outputs.

Wiring and dimensions

Using the included transformer, the demo kit is connected to a 230 V wall socket and offers two easily accessible serial terminals for connection of Regin's communication cables.

The demo case is very easy to bring along on various assignments.

Technical data

Supply voltage	230 V AC
Dimensions (HxLxW)	28 x 38 x 9 cm

For technical data on the built-in EXOcompact C283DT-3-24 controller, please see the product sheet for EXOcompact.
